

Table 1: A complex example for handling tables
Coefficients of friction

Static friction			Sliding friction	
dry and clean	lubricated		dry and clean	lubricated
0.15	0.111	steel on steel	0.14	0.001
0.19	0.1	steel on iron	0.18	0.001

As it is usual, type your own name here, with all the special symbols used in your language: Mikus Dániel.

Table 1. shows loads of examples on how to deal with tables.

If any tables are present, it is possible to create a “collection of the table captions”:

List of Tables

1	A complex example for handling tables	1
---	---	---
